# Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so [manual testing](#) is also encouraged.

## NAMES AND LABELS

|   |                                             |   |
|---|---------------------------------------------|---|
| ▲ | Form elements do not have associated labels | ▼ |
|---|---------------------------------------------|---|

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

## BEST PRACTICES

|   |                                                                                                                                                                        |   |
|---|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|
| ▲ | <a href="#">[user-scalable="no"]</a> is used in the <code>&lt;meta name="viewport"&gt;</code> element or the <a href="#">[maximum-scale]</a> attribute is less than 5. | ▼ |
|---|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|

These items highlight common accessibility best practices.

## ARIA

|   |                                                |   |
|---|------------------------------------------------|---|
| ▲ | ARIA input fields do not have accessible names | ▼ |
|---|------------------------------------------------|---|

▲ Elements use prohibited ARIA attributes

These are opportunities to improve the usage of ARIA in your application which may enhance the experience for users of assistive technology, like a screen reader.

CONTRAST

▲ Background and foreground colors do not have a sufficient contrast ratio.

These are opportunities to improve the legibility of your content.

ADDITIONAL ITEMS TO MANUALLY CHECK (10)

Show

These items address areas which an automated testing tool cannot cover. Learn more in our guide on [conducting an accessibility review](#).

Best Practices

TRUST AND SAFETY

○ Ensure CSP is effective against XSS attacks

○ Use a strong HSTS policy

○ Ensure proper origin isolation with COOP

○ Mitigate clickjacking with XFO or CSP

○ Mitigate DOM-based XSS with Trusted Types

BROWSER COMPATIBILITY

○ Baseline Features

GENERAL

▲ Missing source maps for large first-party JavaScript

SEO

These checks ensure that your page is following basic search engine optimization advice. There are many additional factors Lighthouse does not score here that may affect your search ranking, including performance on [Core Web Vitals](#). [Learn more about Google Search Essentials](#).

CRAWLING AND INDEXING

▲ Page is blocked from indexing

To appear in search results, crawlers need access to your app.

CONTENT BEST PRACTICES

▲ Document does not have a valid `rel=canonical`  
Points to the domain's root URL (the homepage), instead of an equivalent page of content

Format your HTML in a way that enables crawlers to better understand your app's content.

ADDITIONAL ITEMS TO MANUALLY CHECK (1)
